

Our management fees are not set in stone

With the service you are about to enjoy and with everything we provide, we probably should be holding to the industry norm

but, we would hate to lose a good relationship over price

Management fee (% of 1 months' rent) is based on rental amounts

<1,000 = 10%

<2,000 = 8%

>2,000 = 7%

Placing the tenant (leasing fee) is 80% of 1 months' rent

Why are these prices not set in stone?

A fitting example; are you a landlord with multiple properties?
we can work with you...

We understand it is tempting to go with a company that charges around 5% or even one charging a small, flat fee

But remember, you get what you pay for!
